Backend and Frontend Developers- Vokalz

Social Media Platform and social networking platform built for creators and their biggest followers

Major: degree in Computer Science, Computer Engineering, or any related field

Experience: fresh graduates are accepted

1- Backend Developer:
— Develop, maintain, optimize APIs, server-side logic, and database systems.
— Ensure application speed, stability, and scalability under growing traffic loads.
— Implement secure user authentication, authorization, and data protection mechanisms.
— Integrate third-party services (payment gateways, analytics, notifications, etc.).
— Optimize server architecture for faster content delivery and reduced latency.
— Maintain and upgrade cloud infrastructure (AWS, Firebase, GCP, or equivalent).
— Troubleshoot backend performance bottlenecks and resolve system errors.
— Manage database performance, indexing, backup routines, and failover planning.
— Work with DevOps tools for CI/CD, version control, and automated deployment.
— Implement caching strategies for faster video/image loading and content retrieval.
— Ensure compliance with the best security practices and conduct regular vulnerability checks.
— Collaborate with the frontend team to ensure seamless data flow and app functionality.

2- Frontend Developer:
— Maintain responsive, visually appealing UI for mobile and web platforms.
— Ensure smooth rendering of videos, images, and animations with minimal load time.
— Optimize app performance for low-end devices and slower networks.
— Implement user interactions (likes, comments, shares, buttons, wallets, etc.).
— Ensure high-quality user experience (UX) across all devices and screen sizes.
— Fix UI bugs, screen glitches, style inconsistencies, and functional issues.
— Integrate frontend with backend APIs for real-time updates and data sync.
— Improve navigation flows and reduce friction across user journeys.
— Maintain component libraries, UI states, and application architecture.
— Ensure the app follows best practices for accessibility and usability.
— Continuously refine loading times, caching, and rendering strategies.
— Collaborate with backend developers, designers, and QA teams for flawless execution.
