

Full Stack Developer – Naft Plus

A dynamic, multi-division company operating at the intersection of retail, fuel services, and operational excellence

Location: Zgharta- Lebanon

Major: degree in Computer Engineering, Computer Science, or any related field

Work Experience: 3 – 5 years of experience in full-stack development (frontend + backend)

Major Responsibilities:

- Design, develop, and maintain full-stack applications
- Build and enhance ERP-related modules and workflows
- Develop scalable frontend applications using Angular
- Design and manage backend services and APIs
- Work with PostgreSQL databases (design, optimization, queries)
- Collaborate with the Product Owner to translate business requirements into technical solutions
- Contribute to system architecture and technical decision-making
- Assist in the development and integration of AI-driven tools and systems
- Support the creation and training of internal AI models for development automation
- Ensure code quality, performance, and security best practices
- Participate in code reviews and enforce development standards

Additional Requirements:

- Strong experience with Angular (frontend development)
- Solid experience with PostgreSQL (database design and queries)
- Experience API development and integration (RESTful services)
- Experience with ERP systems or enterprise applications
- Knowledge of FMCG industry workflows (inventory, distribution, POS)
- Experience with cloud environments and deployments
- Familiarity with micro services architecture
- Experience using AI-assisted coding tools (e.g., code generation, debugging, optimization)
