#### 5. OBS ISSUES & FIXES

a. Display Capture (Black Screen)

To force OBS to use the Integrated Graphics, follow these fixes:

Fix 1: No Additional Graphics

Fix 1&2: NVIDIA Graphics

Fix 1&3: AMD Graphics

- Fix 1:
  - Go to Desktop

- Right click on any empty space on your Desktop >
   Display Settings > Scroll down to Graphics settings
- Under Graphics Settings,
   Click Browse > Select obs64 (It should be located in
   C:\Program Files\obs-studio\ bin\64bit) > Add
- o Click OBS Studio > Options > Power Saving > Save
- Restart OBS
- Fix 2 (NVIDIA Graphics Available):
  - Go to Desktop
  - Right click on any empty space on your Desktop > NVIDIA Control Panel > Manage 3D Settings > Program Settings Tab
  - Under Program Settings,
     Select a program to customize > Select OBS Studio (If
     OBS Studio does not appear, click Add Button and add
     OBS)
     Select the preferred graphics processor for this program
     Integrated graphics
  - Click Apply and Close
  - Restart OBS
- Fix 3 (AMD Graphics Available):
  - Go to Desktop
  - Right click on any empty space on your Desktop >
     AMD Radeon Settings > Preferences > Radeon
     Additional Settings
  - Under Power, Click Switchable Graphics Application
     Settings, Select OBS Studio (If OBS Studio does not
     appear, click Add Application >)
     Select a program to customize > Select OBS Studio
     (If OBS Studio does not appear, click Add Button and
     Select obs64; it should be located in C:\Program
     Files\obs-studio\ bin\64bit)
  - o Click the dropdown menu and select power saving
  - o Click Apply and Close
  - Restart OBS

#### 6. Video Capture (not working)

Turn on the Camera

#### 7. Runtime Components Missing

Download them, then install OBS

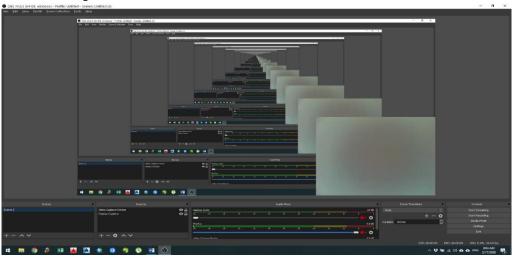

#### 8. Failed to start streaming

Settings > Output > Streaming > Encoder > Software (x264)

#### 9. Failed to load channel

For previously connected account, just click OK. For new accounts, wait till the server problem is resolved then go to settings > stream > connect account

#### 10. Screen Sample

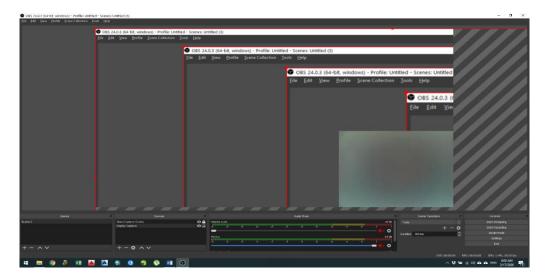

- a. The screen should look as the above picture
- b. Video Capture Device:

Reduce the size and move it to the upper left corner

c. Display Capture:

Resize and move it to fit in the black window

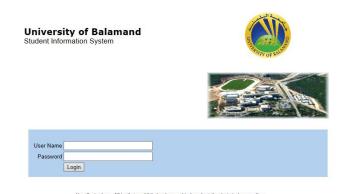

d. If your screen looks like this, click the Upper Left Corner of the red frame and drag it Bottom Right, then drag the whole frame Upper Left. Keep on doing it so the display capture fits the black window below it.
